SUMMARY

What's the one thing that makes you the best candidate for this job?

EDUCATION

B.S. Information Systems and Decision Sciences

Louisiana State University

12/2022　📍 Baton Rouge, LA

EXPERIENCE

Analytics Intern

Cadence Insurance

📅 07/2022 - Ongoing　📍 Baton Rouge, LA

Cadence Insurance is the insurance brokerage branch of Cadence Bank that matches companies with insurance agencies that meet their needs. The analytics team is small and wears different hats daily.

- Designed and built a Django-based web application to manage user accesses using Python, HTML, CSS, and JavaScript
- Modeled new database in Django by refactoring and improving legacy database structure
- Migrated and cleaned data from legacy Access application to said Django database using complex SQL statements and Python

Internal Audit Intern

City of Baton Rouge

📅 04/2021 - 07/2022　📍 Baton Rouge, LA

- Developed the City's 2022 and 2023 Risk Analysis Reports detailing areas that posed a financial risk to the City's budget
- Audited and reported on the payroll of the Baton Rouge Fire Department
- Used various ERP software to pull data from multiple City divisions
- Wrote Python script to clean, organize, and enter data into Excel documents

Salesman

Banana Republic

📅 06/2019 - 02/2021　📍 Gonzales, LA

- Top 40 salesman nationwide among all GAP brands for 2020
- Developed sales strategies and techniques

ACHIEVEMENTS

🏅 **Top 40 Salesman in the Nation for GAP Brands 2020**

🏆 **High School State Championship (Coach) 2021**
　　Coached a highschool lacrosse team to a state championship by installing the values of hard work, dedication, and teamwork

PROJECTS

Visualization of Senior Mental Health by Country

For this project, I created a PowerBI dashboard to find drivers that might affect the mental health of older people. I accomplished this by examining suicide rates among older populations as reported by the WHO and then seeing if there was a correlation with other indicators such as lack of mental health facilities and domestic violence rates.

Lit Pizza Database Project

For this project, I created a database using a Lit Pizza as a mock client. To design the database, I created an Entity Relationship Diagram and a Relational Database Model. Next, I used SQL to insert tables and data to the database and then used complex SQL queries and views to analyze the data.

Django Pages Application

In this project, I used Python and the Django framework to create and host a web application. I also utilized Git and Github pages to display the application.
